CTA Group fills a unique segment of the building and construction market by providing specialized building products for the orientation of people with vision impairment, as well as more traditional products such as floor coverings, metal works and joinery, together known as finishing products.

CTA Group inspires clients to work collaboratively by improving the built environment with the specification of products that meet high sustainability standards. CTA Group's mantra is that there is greater "Strength in Partnership".

# CTA Company

Twenty years of business excellence does not happen by mistake. It takes a lot of drive and commitment but most importantly, it requires trust! It's this fact alone that keeps customers coming back to a business partner who they know they can rely upon. A business who they know can and will deliver for them. It's this trust that drives us to the point where we understand that there is great – **Strength in Partnership.** A strength that is driven by an unselfish, collective achievement.

Strength in partnership drives the CTA business. It's in the way we speak, the way we greet each other every morning and it's in the way we conduct ourselves with our most important asset, our customers, the people, and businesses that rely on us.

CTA Group defines the very highest level of service and dedication to the construction industry. For over 20 years, we have led the way in providing innovative, patented wayfinding solutions so that our business partners can achieve their mission in construction. We've invested in research and development, people and products that are world class and are now exported to many countries around the globe.

From these humble beginnings, we have become one of the most diverse manufacturers, suppliers, and installation subcontractors for many finishing products in the commercial construction industry you see today. Our success is achieved through our strength in partnerships, exemplary values, and unrivaled excellence in project execution.

Next time you walk around the built environment, take a careful look around. Whether it be the Tactile Ground Surface Indicators on a tram-crossing or on the edge of a railway platform; or the engineered timber, carpet, and vinyl in the foyer of a luxury high-rise residential tower; or perhaps the high-end joinery at the local library, or better still the chain wire mesh batting enclosure at the local baseball stadium; chances are it was delivered in partnership with CTA Group.

Through each stage of your project, we will walk alongside you to ensure that timelines are being met in accordance with the quality that CTA products and services are renowned for. Every interaction with CTA is set to be a positive and memorable one from which you will come to understand the meaning of true Strength in Partnership.

As business owners, we always wanted to get the very best out of ourselves and be that company people could rely on. Now 20 years in, those values are central to the way we go about things, and we are excited to partner with some of the industry's strongest and most innovative builders.

Over the journey, we've grown our stable of products and services considerably, having initially started the "tactile industry" back in the early "00"s, we now fill a very unique space in the commercial construction sector, with the provision of tactile guidance products, civil furnishings, basement car parking solutions, chain wire mesh and tubular fencing, storage cages, hoarding, engineered timber flooring, carpet and vinyl flooring and high-end joinery.

CTA group's success in this area of operation brings great opportunity for our strategic partners both customers and suppliers. The ability to consolidate product lines and services provides opportunity for the industry as a whole. CTA group's success in this area of operation brings great opportunity for our strategic partners both customers and suppliers. The ability to consolidate product lines and services provides opportunity for the industry as a whole.

This is where there is true Strength in Partnership! – we can't wait to get started on your new project!!

From the directors - **Daniel DeDomenico**  
- **Secondo Galstaldello**

The difference between ordinary and extraordinary is that little extra...

# An Established Company with a Large and Experienced Team

With offices in four states and one of the largest and most experienced installation teams in the country, you can be confident knowing CTA has the skills and manpower to ensure your project is completed on time and to the highest possible standard.

Our clients include SME's; Government entities, both local and federal; Tier 1 builders; and large multinationals.

The business operates from 3 production facilities in Melbourne - located in Tullamarine, Keilor Park and Truganina with a combined footprint of over 4,500 Square meters. Interstate warehousing, distribution and installation capabilities are also located in Boondall Queensland, Rydalmere NSW and Cockburn in WA. Combined, the CTA Group operates from over 6,000 Square meters of warehousing space and employs over 80 people nationally.

**Our export markets include the United Kingdom, UAE – Dubai and Qatar, Hong Kong and Norway.**

At CTA, we stand behind everything we do and can guarantee your project will be delivered to specification, to standard and to sign off.

# Testimonial

Sydney Civil Pty Ltd were recently awarded the civil works Contract by The City of Sydney, which involves carrying out upgrade work programs in the Sydney CBD and surrounding inner city suburbs. As part of this contract, we are responsible for the installation of access products, such as tactile ground surface indicators, for which we engage CTA (NSW). We find CTA's team professional, friendly and always reliable. We also find their product quality and workmanship to be excellent and have no hesitation in recommending CTA Group

- Srdjan Djukic

**Project Manager, Sydney Civil Pty Ltd**

As a leader in the delivery of infrastructure projects, Downer relies heavily on our subcontractors ability to deliver on their trade specific responsibilities. When we were recently approached by Transport NSW to upgrade Glenbrook railway station to comply with public access standards AS1428, we consulted the Tactile guidance product specialists.

CTA Group was able to measure and compare the luminosity of surfaces and develop for us, a product with very specific luminance values, one that ensured compliance for Glenbrook's platforms and external civil works. CTA developed this product on a short lead-time and was able to supply and install to suit a very tight delivery program.

We find CTA Group professional, everyone on site was a pleasure to deal with and I have no hesitation in recommending them to any company tasked with compliance to the public access standards

**- Ryan Camilleri**  
**Site Engineer, Downer Group**

CTA Commercial Flooring Installations was awarded the flooring package for The Fifth residential tower, comprising over 400 high-quality apartments over 50 levels on the corner of Spencer and Lonsdale Streets in Melbourne.

The directors of CTA understand the importance of a client focused approach establishing themselves as a firm who delivers great service with the kind of open communication we have come to appreciate. They understand the importance of having the necessary manpower to accelerate on and off through-out the build program in order to maintain our build schedule. Their entire team has been a pleasure to work with.

Since doing The Fifth I had no hesitation in awarding CTA **The Victoriana**, a double fronted Albert Park development featuring 250 premium and bespoke apartment residences over 18 levels. I regard them as very capable and a highly reliable subcontractor

**- Michael Perdikaris**  
**Project Manager, Hickory Group**

Our relationship with the CTA Group spans quite a few years, having first engaged them in 2006 to complete fit-out works at Melbourne Airport, Gate 9.

CTA have always proven to be competent and professional. Their entire process from tender submission to installation is seamless, efficient and reliable.

CTA is always responsive to our needs, having always delivered projects on time and within budget.

We highly recommend the CTA Group.

**- Scott Reed**  
**Project Manager, LU Simons**

# Financial

## Commitment to risk mitigation

Over the journey, CTA has delivered several hundred million dollars worth of fit-outs with a steady increase in project size, a focus on customer retention and consistently delivering projects on time and within budget.

Since CTA's inception in 2004, the Group has consistently grown its year-on-year revenue, irrespective of the prevailing business cycle. Our diversified business, which operates across each of Australia's largest cities and extensive customer base, has meant that we don't rely on a single source of revenue.

Our robust and stable financial performance is backed by a well capitalized balance sheet, with net assets built up steadily over time through retained earnings and limited borrowings.

CTA Group's products are Australian Standards compliant; offering the highest safety ratings in the industry.

10 years manufacturers warranty, the highest in the industry.

National warehousing, distribution and installation capabilities

Extensive range of modern product choice and colour options.

A complete range of products that are designed for the built environment that satisfy: Wayfinding; fencing and metal works; floor coverings and joinery packages.

# CTA Group's Product Range

## Wayfinding

### Tactiles & Stair Nosings

COMPLIANCE TO AS1428 - ACCESS TO THE BUILT ENVIRONMENT FOR CLASS 1 - 9 BUILDINGS

### Railway Infrastructure

THE LEADING PRODUCT INNOVATOR TO THE RAIL INDUSTRY WITH OUR PROVEN AUSTACT PRODUCT RANGE. WARRANTED TO PERFORM IN THE MOST EXTREME ENVIRONMENT FOR 10 YEARS

## Metal Works

COMMERCIAL FENCING, INCLUDING: CHAIN LINK AND TUBULAR FENCING; PROPRIETARY HOARDING SYSTEMS, STORAGE CAGES; STANDARD SWING AND AUTOMATED GATES; SPECIALTY SPORTS ENCLOSURES INCLUDING BASEBALL, CRICKET AND THE LIKE; AS WELL AS OTHER METAL WORKS PRODUCTS ALL MANUFACTURED IN-HOUSE.

## Commercial Flooring

SUPPLY AND INSTALLATION OF COMMERCIAL FLOORING PRODUCTS, INCLUDING: ENGINEERED TIMBER; BROADLOOM CARPET; VINYL AND RUGS.

## Commercial Joinery

DESIGN, MANUFACTURE AND INSTALLATION OF CUSTOM JOINERY INCLUDING: KITCHENS; ENSUITES; WARDROBES; FIT-OUT OF SCHOOL AND LIBRARY FACILITIES; FRONT OF HOUSE RECEPTION AND BESPOKE CUPBOARDS, DESKS, SHELVING AND WALL PANELING.

# Tactiles & Stair Nosings

CTA prides itself on offering the highest level of service. Our sales team is extensively trained in the requirements of AS1428 to make sure we offer you the perfect solution for each project.

Where required, CTA Group is happy to perform site visits and luminance testing to ensure that your product selection will conform with the relevant building codes.

We understand that you are bound by strict deadlines and will work with you to meet your compliance requirements in accordance with your schedule. And, the service doesn't end at the installation, we offer post-installation sales service which has helped to develop the outstanding reputation that CTA Group is proud to have.

## Bourke Place Building

SureSteel stainless steel tactile ground surface indicators were the perfect choice for the installation of curved stairs at Bourke Place in Melbourne. The installation required skilled installers with specialised equipment in order to provide a precision finish of the highest possible standard.

It was due to CTA's patented Drill&Lock technology that the area was able to be opened to the public immediately after installation - meeting the project's tight deadline.

### PROJECT DETAIL

**LOCATION** - BOURKE PLACE

### PRODUCTS USED

- SureGrip™ FibreGlass safety stair edging
- SureSteel patented stainless steel Tactile Indicators
- Flooring Accessories
- StepRight Architectural entrance matting and other flooring accessories

# Railway Infrastructure

For nearly 20 years, CTA Group has been providing DDA compliance to the railway industry across Australia and overseas.

When CTA first began designing tactile products in 2004, we recognised the importance of luminance contrast and invested in the capacity to deliver a product that also provides superior luminance contrast for use in commercial buildings, as well as in high traffic applications such as railway stations.

As a specialist in the industry, CTA has the capacity to measure luminance contrast and provide a conformance guarantee, as well as the expert knowledge to develop products where necessary to meet specific requirements.

## Delivering significant savings in protection costs.

In March 2021 CTA Group smashed through a long standing frontier, achieving what most considered to be physically impossible. With a fleet of purpose engineered Tri-Quad Drill Rigs and a team of experienced installers, CTA completed a DDA compliance upgrade on two full size railway platforms at Regent Park Railway Station on Sydney's inner-west corridor, in under 16 hours.

This heralds a significant achievement in the industry, making Tactile Ground Surface Indicator (TGSi) installation convenient for rail operators by delivering significant savings in downtime and protection costs.

**CTA** GROUP **Strength in Partnership**

*"This achievement not only delivers significant savings to Rail NSW, it confirms a decision we made a number of years ago to invest heavily in what is now unquestionably the largest and most experienced TGSi installation resource in the southern hemisphere. With ongoing continuous improvement in our manufacturing process and polymer selection – we are proud to deliver unmatched product quality and exceptional service to our customers"*

Ron Walters, Sales Manager CTA NSW

# Metalworks

400 JOBS COLLABORATE WITH ARCHITECTS TO DELIVER THE GREATEST VISION FOR THE PROJECT'S CONCLUSION.

CTA Metal Works is a dedicated cell within the CTA group that is capable of delivering end-to-end steel fencing and fabrication solutions to the commercial and civil sectors including: chain link and tubular fencing; proprietary hoarding systems, storage cages; standard swing and automated gates; specialty sports enclosures including baseball, cricket and the like; as well as other metal works products all manufactured in-house to the highest quality standards

With a full in-house design, welding, project management and installation team, over the last 2 years, CTA Metal Works has delivered 3 VSBA school bundles including X primary schools and X highschools with over X linear meters of perimeter fencing; x linear meters of 3.6m high sports fencing and many other forms of enclosures totaling circa \$Xm

## Clyde Primary & Secondary school.

Hutcinson's Builders employed CTA Metal Works to install nearly 1,000 linear meters of fencing according to various specifications around Clyde Primary school. Working closely with our design and installation team the installation was completed on time and in accordance with the VSBA design intent.

## CTA PRODUCTS

- 18 hooped bike rack
- 75M of service enclosures
- 168M of 6m high fencing
- 28M of bike store enclosures Bin store enclosure
- 20m of timber fencing
- 546M of external tubular fencing & gates
- 65M of 3600H Fencing

# Commercial Flooring

CTA Group offers a full suite of floor covering services, from the preparation of subfloors to the final installation of engineered timber; carpet, both broadloom and tiled; vinyl; and other specialty surfaces.

Our reputation has developed alongside the constantly changing world of commercial flooring technology, having supplied and installed flooring finishes in some of Australia's most renowned landmark residential towers throughout Australia. CTA Group has the experience and resources to deliver commercial floor projects of any size and breadth.

We understand your objective is to remain within the build sequence and be capable of accelerating as project demands increase. Our team of project managers and skilled installers are committed to providing an excellent outcome.

## Opera

In 2018, CTA Group partnered with Hickory Constructions to deliver top-tier design and fit-out for 235 residences across 19 levels.

### PROJECT DETAIL

### CTA PRODUCTS USED

- High-end designer rugs manufactured, supplied and inlaid, to client specifications
- European Oak, engineered timber flooring
- StepRight Architectural Entry Matting
- High-density carpet underlay,
- ProStep safety stair edging and other flooring accessories

# Commercial Joinery

CTA Commercial Joinery delivers custom Australian made joinery and services that are proactive to our clients demands. Our purpose built factory in Truganina is designed to meet the high-volume requirements of commercial joinery projects, ensuring our ability to deliver on time and to the highest standards.

CTA's project development capacity, expert in-house engineering and project management team, and strong relationships with manufacturers and suppliers of materials, equipment, and tools allow us to offer the most cost effective solutions for our clients.

The team has handled a variety of projects, from commercial fit-outs to the construction and renovation of residential, leisure and aged care facilities. The architect has a broad range of experience in a number of sectors, whether renovation or new construction.

## Tungs

CTA partnered with Kapitol Group to produce high-quality design and fitouts for the Tungs apartment building in Melbourne's CBD. The structure includes 55 build-to-rent 1, 2, and 3 bedroom apartments, two penthouses, a common rooftop patio, ground-floor store space, two levels of commercial office space, and a two-level cellar.

# The Facts

CTA Group was founded in 2004 and has grown steadily from a family owned company to an international Group of specialists in public access and fit out solutions

The group is represented by 7 trading entities consisting of CTA (QLD), CTA (NSW), CTA (VIC), CTA (WA), CTA (CFI) - Commercial Flooring Installations, CTA Metalworks & CTA Commercial Joinery which operate in each of the respective states.

The CFI entity is based in Melbourne and services the Commercial Flooring industry, specialising in Engineered Timber flooring, Vinyl and Carpet (both broadloom and tile).

As well as these trading entities, CTA Group also includes CTA Australia which owns intellectual property vested in numerous product patents and CTA International which exports to Europe, the Middle East and the Asia Pacific region.

CTA Commercial Joinery compliments the commercial flooring division by completing large scale kitchens & cabinetry projects in tandem for multi-million dollar inner city sky rise projects.

The business operates from 3 production facilities in Melbourne - located in Tullamarine, Keilor Park and Truganina with a combined footprint of over 4,500 Square meters.

The CTA Group is Australia's largest wholesale distributor and commercial contract installer of Tactile Guidance products which are supplied and/or installed through an extensive distribution network.

Interstate warehousing, distribution and installation capabilities are also located in Boondall Queensland, Rydalmere NSW and Cockburn in WA. Combined, the CTA Group operates from over 6,000 Square meters of warehousing space.

Over many years, CTA has forged a reputation for quality, service and engineering innovation and holds numerous patents, design registrations and trademarks for its products.

CTA Metalworks was formed after the acquisition of an already established Melbourne fencing company that had been operating for over 10 years. CTA Group has poured extensive resources into this new acquisition to bring it up to the industry-leading standards that the group has become renown for.

The business operates from 3 production facilities in Melbourne - located in Tullamarine, Keilor Park and Truganina with a combined footprint of over 4,500 Square meters.

The Group has several key distribution relationships for its Tactile Guidance products in Asia, the Middle East, Europe and the South Pacific. Our Products are found in many major projects in these markets

CTA has offices in each of the eastern seaboard states of Queensland, New South Wales and Victoria, as well as WA. Head office is strategically based in the Melbourne suburb of Tullamarine, facilitating quick access to the Melbourne City, East and Western suburbs via the Tullamarine and Western Ring Road freeways.

CTA is an equal opportunity employer with over 150 full time staff residing in several major capital cities in countries all around the world including: Australia, The Philippines, Hong Kong, Taiwan, The United Kingdom and The U.A.E.

The CTA Group was the first in the "Tactile Industry" to be independently accredited with the 3 recognised standards of business excellence, including: ISO9001 – Quality; ISO14001 Environment; and BS OHSAS 18001 Occupational Health and Safety.

# Defining Our Standards

## Compliance To AS1428

Traditionally, Tactile Ground Surface Indicators were difficult to source, expensive and only available in a limited range. Viewed by architect's, specifiers and builders as unwanted necessities, they were products that often detracted from the architects design. 16 years ago CTA transformed this view and the industry, with a focus on developing innovative new products and we now provide architect's with a multitude of design options. Our products introduced a previously unseen level of functionality and safety to the market, a greater range of product choice and a modern, sophisticated colour palette.

## Patented products

For builders and property owners, CTA's patented products deliver industry-leading safety, ease of installation and peace of mind. CTA now provides the most extensive range of tactile guidance systems in Australia including the patented SureSteel® and PolyBlade® products. We are well respected within the industry for providing an unrivaled level of service and 'making it easy' for our customers.

## Market leader

As a market leader, CTA is the first and only company in the industry to achieve ISO9001 quality accreditation and our products and services are guaranteed. Most importantly, as an established, experienced company, we ensure each and every one of our tactile installations complies with the specifications, is to standard and is always delivered through to sign-off. Today CTA is renowned for providing industry-leading tactile guidance products as well as a whole suite of complementary turn-key finishes. We provide a full range of products associated with compliance to AS1428, including safety stair edging, architectural entry matting, concrete surface treatments, car park fit-out solutions, commercial carpet/vinyl and much more.

## Global reach

Over the past 16 years CTA has developed a comprehensive network within Australia and Internationally. With experienced product specialists and installers in Victoria, New South Wales, Queensland and Western Australia, we are the largest stockist and installer of tactiles in the country. CTA products are also available via an extensive network of distributors internationally, with each product designed to meet local standards.

## Defining our Standards

When you choose or specify a CTA product, your decision is supported by industry professionals, trades people and thousands of others who insist on premium quality and superior products. This means that in the unlikely event a problem occurs, you can remain confident that CTA will be here to answer that claim. We are so confident in the quality of our products that we offer up to 10 years manufacturers warranty, the highest in the industry.

# MAJOR PROJECTS

With an outstanding processes and project management team. CTA have delivered on important projects and established a product line with innovation that is committed to providing you with the best possible solutions.

- Port Arlington**, - Kitchen / Cabinetry / Bathrooms / Wet Area's/Custom Fitouts Timber Joinery /Storage
- Shepparton** - Kitchen / Cabinetry / Bathrooms / Wet Area's/Custom Fitouts Timber Joinery /Storage

### Daniel DeDomenico - Managing Director

A bachelor degree qualified Mechanical Engineer with many years of experience both in the automotive and floor coverings industry.

Daniel was previously divisional General Manager of Australia's largest manufacturer of automotive engine components. He founded CTA with a belief in delivering high quality, Australian Standards compliant products, backed by a process driven approach to installation and service.

Daniel has in-depth knowledge of quality, production and project management systems, having implemented the "3 pillars of business" - ISO9001, ISO14001 and OHSAS18001, namely quality, environment and OH&S systems.

Daniel's experience also includes patent law and industrial relations. To-date, Daniel has numerous patents including the original Drill&Lock system, which has revolutionised the installation of wayfinding products in Australia and overseas.

### Secondo Gastaldello - Sales Director

Secondo is responsible for overseeing CTA's sales and installation services across Australia. After beginning his career as an aircraft mechanic,

Secondo has gained over 25 years' experience in the floor covering industry. Secondo co-founded CTA and has built the companies reputation on a willingness to go the extra mile, delivering on his promise and establishing strong client relationships.

### Ron Walters - New South Wales Sales

Ron has over 20 years' experience in the tactile industry and came to the group with the acquisition of Austact Pty Ltd in June 2018.

He assisted in the initial set up of Austact Pty Ltd to compete in the wayfinding industry and during this time was successful in having Austact Pty Ltd selected as an accredited tactile product installer to railway stations throughout NSW on behalf of RailCorp/Sydney Trains. Ron is regarded as an expert in the design, manufacture, and installation of TGSIs and regularly provides advice on the selection and specification of tactile ground surface indicators.

He has consulted to numerous stakeholders in the industry and was recently involved in changes to the Transport NSW specifications to ensure TGSIs meet the luminance contrast requirements of the Australian Standards.

### Jon Reinhardt - Installation Manager NSW

When it comes to installation management, there isn't much Jon hasn't encountered. Having worked for a number of multi-national organisations, such as: Duncan Solutions, a global leader in parking solutions; Cubic, installing the Opal ticketing system across the bus network in NSW; and Silent Gliss, a swiss company producing motorised blinds; Jon has managed teams big and small. Having a background in aircraft maintenance, Jon understands the need for stringent processes and procedures and attention to detail.

His resume is one of long term service to his employers and utmost reliability and attention to detail for his clients, with a tenure of over 18 years with Duncan Services as an example. Having joined CTA Group in 2019, Jon has relished in the railway industry where his application of tight schedules, machine preventative maintenance and redundancy programs and 6S systems have enabled ongoing continuous improvement.
